

Questions and Answers for fresher Oracle DBA Job and Successful candidates from ITS.**As a Oracle DBA fresher, will i get job ?**

Ask yourself why one should give you job ? Do you feel that your are OCA/OCP and you will get job ? How did you pass your OCA / OCP exams – Just by reading dump ?!! Do not cheat your self that you are fresher and not getting Job, because there are lots of successful DBAs and they all were freshers once upon a time. Just think that how these experience DBAs got jobs? Always see successful DBA profiles and failure attempts they made to become successful. How can you think that just 120 hours DBA course can make your life's next 25 years of profession. This is bitter but 100% truth. The fact is there are lots of opportunities for freshers in IT job market and that is the reason why Infosys, wipro, TCS and many other Indian MNCs conduct campus interview at colleges for freshers. They train them and make them ready for software solutions. Because of freshers major software industry players able to manage their overall profit against increasing expenditure outflow.

Then what to do ?

It is very simple. To get DBA job you must be eligible first.

What is eligibility ?

Eligibility = Relevant Experience + Relevant technical Skill.

As a fresher you do not have experience so you need to target only skills.

Then What skills required to be shortlisted or noticed ?

Find out what industry wants in a DBA ? You can find out this just by googling Oracle DBA Jobs. Go through job description (ignore experience line) and note down DBA skill sets. Try to gain this knowledge as fresher. I am sure you will have better opportunities with these actual industries requirement then just DBA OCP. Always remember that actual DBA course and industries' DBA skill requirement have huge differences. (your DBA course does not include pl/sql, linux/unix script, RAC, DataGuard, Advance performance Tuning etc, which is must as DBA nowadays)

Do i need to do PI/SQL even if i want to go for DBA ?

Yes, PI/sql is not a part of regular DBA OCP program. It is a separate course. Then also all major DBA job descriptions have pl/sql knowledge requirement and hardly people know that PI/sql is prerequisite to start administration workshop-2 training. PI/SQL is must. PI/SQL will help you in your entry level job.

What if i do only DBA ie only 3 subjects on 10g DBA / 11g DBA ? Will i get job on that basis ?

Our lots of candidates have got job on the basis of just 3 subjects with OCP certification. But we recommend to follow industry requirement to get more and proper job opportunities.

I have hardly seen fresher jobs for Oracle DBA on various job portal?

If it is so then why lacs of students are doing OCPs every year worldwide and lots of them have

already been established a successful Oracle carrer. Database servers are everywhere in all verticles and hence jobs are there for right oracle DBAs.

I am non IT graduate, will i get Oracle Job ?

IT is for everyone those who have right knowledge. Every employer wants to cut down his expenditure cost on salary and they are seen getting benefited by hiring non IT but with “attitude to learn and leverage” candidates. We have list of commerce graduates who have secured good oracle career.

Ultimately Right Knowledge always bring opportunity to every one.

Partial List of Successful Placements

Sr.	Name	Company Name	Designation
